

## Use of Cargo Containers

The following is information needs to be addressed when repurposing cargo containers. However this is not a complete list. Depending on what you will be using the container for, office, food catering, waiting room... there will be additional requirements for the container.

- Provide construction documents sealed by a design professional licensed in the state of Kansas.
- Provide data plate information containing ISO 6346 information.
- Any wood used in the container shall be protected against decay per 2015 IBC section 2304.12.1.1
- Any Floor Ventilation shall comply with 2015 IBC Section 1202.3
- Roof assemblies shall comply with 2015 IBC chapter 15
- Joints and voids shall be protected from fire in accordance with 2015 IBC section 715
- Repurposed shipping containers shall having all structural changes comply with 2015 IBC chapter 16
- Foundation for these containers shall comply with 2015 IBC chapters 16 through 23
